

Spring 2013
Children's Vegetable Garden Program
Planting Diagram

To properly read this guide, orient yourself at the beginning of the irrigation on/off switch.

- ◆ This diagram is meant as a guide and may be subject to change.
Each garden bed is approximately 28 feet long by 3 feet, 6 inches wide.
- Instructors, please remind the children that seeds germinate better if planted in moistened soil.
Transplant holes also need to be watered prior to planting.
