- Communities & institutions

**Outcomes**

**Short-term Learning**
Participants learn the importance of healthy eating habits, physical activity, food safety and budgeting food dollars.

**Medium-term Action**
Participants adopt healthy food behaviors, increase physical activity, use food safety practices and spend food dollars wisely.

**Long-term Conditions**
Communities and institutions promote healthy lifestyle changes through improved diet quality and physical activity.

Revision of laws, policies and practices related to the development of healthy eating habits and lifestyles.
