

What will we do?

- Extension has the responsibility to tell eXtension their needs and expectations. Particularly concerning issues, innovations, and impacts
- eXtension will meet with groups more periodically. Groups = Southern PLN committees, Ext directors, AEA, administration
- eXtension will create slack channel for IT for feedback and communication
- Member directors and administrators will identify local educators to be part of issues hubs.
- Extension and supervisors make a priority to participate in the hub
- eXtension needs to find good messaging to use across the system
- innovation projects will report their results and find where they fit in the 2-3 issues

In what ways can eXtension enable CES to do extension – like an enterprise system?

Example climate

- Enable CES to help ranchers, farmers, foresters adopt resilient plans and practices
- Be a needed resource?
- Acent me (?)
- What is the impact on our personnel?
- What is the difference?

Evolve for greater impact
